

Week 3 Report — Digital Detective

Project: Digital Detective

Week: 3

Language: Java

IDE: Visual Studio Code

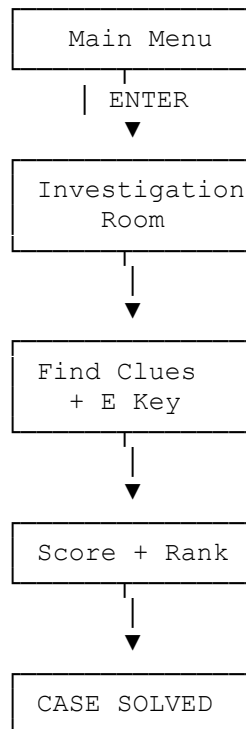

Objective

The objective of Week 3 was to develop the **basic playable framework** of the Digital Detective game and implement its core gameplay mechanics.

Work Completed

- Created the Java game structure and multiple classes.
- Developed the main game window and menu.
- Added detective/player movement using **W, A, S, D**.
- Added an investigation room.
- Added **5 clues** for the player to find.
- Implemented clue collection using **E**.
- Added a **score system** based on collected clues.
- Added **case completion** when all clues are found.
- Added detective ranking based on the final score.
- Added **ENTER** key to start and restart the game.

Game Flow

Result

The **Digital Detective prototype was successfully developed and tested.** The game can now be started, played using keyboard controls, clues can be collected, scores are calculated, and the case can be completed.
